ROCKHOLD INCOME

INVESTMENT OBJECTIVES

The Portfolio's investment objective is to achieve a combination of moderate-income yield and capital growth by deploying a globally focused multi asset strategy.

INVESTMENT APPROACH

The portfolio will gain this exposure through the use of collective investment schemes combining fixed income and income/dividend producing assets.

WHO THIS PORTFOLIO IS SUITABLE FOR

This portfolio is suitable for all types of retail and professional customers that are receiving advice

from a financial adviser. As you will be investing in stock market-based investments, you should be prepared to invest for a minimum of 5 years. The portfolio is designed to generate income with an element of growth but does not provide any form of guarantee. Should the value of your investment go down you should be in a financial position such that this will not have the effect of a reduction in your standard of living. Your financial adviser will determine the most appropriate portfolio based on your risk profile. We do not offer any investments that come with no investment

risk or are very high risk, this means that the value of your investment may go down as well as up.

MANAGER'S COMMENTARY

October was turbulent for risk assets, with early gains eroded by month's end as liquidity waned. Valuations in some sectors appear stretched, raising questions about the potential for a year-end rally.

In the UK, Chancellor Reeves abandoned fiscal rules, adding £50+ billion in debt. Despite parallels to Mrs. Truss's policies, market reactions were muted. Gilt yields rose to 4.4% with more issuance expected, while UK equities remain selectively appealing. The US economy remains strong, with 3.4% GDP growth and low credit spreads indicating corporate health. Inflation hovers at 2.4%, though adjusted figures fall below 2%. Improved October employment data reduced bond market's expectations for further Federal Reserve rate cuts, pushing Treasury yields higher and challenging equity valuations. Despite this, a November rate cut remains likely as the Fed navigates easing employment pressures.

As the US election nears, markets react to shifting poll dynamics. Ample liquidity supports risk assets, and a stronger dollar reflects geopolitical concerns. Overall, optimism persists for a solid year-end finish. China's \$28bn stimulus, though significant, falls short of market expectations, leaving recovery prospects uncertain. Investors demand more decisive action from the People's Bank of China. Japan's weaker yen and rising inflation have become problematic, increasing the likelihood of Bank of Japan intervention. Additionally, China's low-cost exports are pressuring Japan's vehicle exports, signalling that equity values may have peaked.

In Europe, inflation has dropped to just above 1%, but economic struggles in Germany and France persist, with manufacturing in decline. Volkswagen's factory closures highlight the challenges. Another round of quantitative easing could be on the horizon as the Eurozone navigates its fragile recovery. Portfolios have performed well, benefiting from strong liquidity. However, with momentum fading, we're considering profittaking and reducing risk, particularly in Japan, where positive trends are losing steam.
